About me, Jean Rossouw

I am a Certified Breathwork Practitioner, Yoga Instructor, Facilitator, Entheogenic explorer, Traveler and adventure seeker. I am passionate about introducing people to the power of Breathwork for physical, spiritual and psychological wellbeing, while being a keen explorer of modalities that further these dimensions of living.

Driven by a passion for healing, change and growth, I am inspired by the overlap between spirituality, neuroscience and transpersonal states. I support inner transformation and personal development through various tools, such as Breathwork, Yoga and Entheogenic exploration.

Through these modalities we are guided to evolve our consciousness, expand our knowing and connect with the healer within. Through accessing more of our authenticity, we support a more meaningful, purposeful and harmonious life.

~ More about my Journey ~

Since I was twenty years old, my interest in expanded states of consciousness got ignited by Psilocybin Cubensis (Mushrooms), shaping this curiosity into a path which has been driven by books about Consciousness, Spirituality and Entheogens.

Entheogen's (Psychedelics) gave me the first glimpse of the magical essence of my Breath. During my years of travelling the continents, Yoga came on my path which shifted my awareness inwards. I did Hatha Yoga teacher training in India and Yin Yoga in South Africa, where I gained a basic knowledge on Breath Awareness and Pranayama (Breath Regulation).

From here my path took me to the Amazon Jungle where the sacred medicine Ayahuasca clearly sent a message into the depths of my being. My breath is my connection to myself, to the earth...to everything in the universe...to all other dimensions. Ultimately to the question "Am I?", and the answer "I am".

After experiencing Holotropic Breathwork in San Francisco in 2017, I got the clear message that I should delve deeper into Breathwork and possibly start training in the field. I came back to South Africa and found Breathwork Africa with Dr Ela Manga as my teacher.

This was the start of my official training as a practitioner, and since then I've completed my Foundations course and Advanced Breathwork Practitioner training in 2019. I went back to California and did more Breathwork Facilitation Training at The Breath Centre, with Michael Brian Baker. After that I've attended workshops with Dan Brulé in California and South Africa, learning more about Breathwork as a whole. There's been so many inspiring people on my path and all of them contributed to my knowledge and understanding on Breathwork and Transformational experiences.

I have come to a point where I would like to teach people how to facilitate sessions with Breath as a tool for Transformation. Now is the time where people need to wake up to their breath in order to break the cycle of generational trauma (Especially in South Africa) and get in touch with their Authenticity, which today can be seen as a survival necessity.

Breathwork Africa and Pneumanity Breathwork

Founded by medical doctor, Dr Ela Manga, Breathwork Africa is a social enterprise and community network that is committed to sharing the art and science of breathwork as a tool of self-empowerment, healing and transformation through Individual and groups sessions, practitioner training, talks and workshops.

Practicing Breathwork in the Southern African context is humbling and heart opening, inviting us to listen and learn from the wisdom of the people and the energy of the land. It requires an approach that is adaptable, simple, safe, and most importantly, accessible to all people. Breathwork Africa believes it is time that the world benefit from the wealth of knowledge and indigenous wisdom of the continent – therefore we offer Pneumanity™ as part of everyone's birthright.

Pneumanity™ is both a practical toolkit and a multidimensional approach to conscious breathing. It is grounded in science and is inspired by the ancient knowledge that is deeply rooted within the spirit of Africa. It is a system that draws on a vast range of styles and practices but that is manifest from the cradle of all humanity – Southern Africa. It underpins all that we do at Breathwork Africa. It is distinct to us and is uniquely African and yet is universally applicable and accessible to all. Pneumanity™ is borne from the words 'Pneuma' and 'Humanity'.

Nlom, Ntu, Umoya, Chi, Seiki, Prana, are all expressions of Pneuma, the ancient Greek word that describes spirit or breath, the universal life force. It is acknowledged in every tradition, religion, and indigenous knowledge system. In African cosmology the concept of Ntu describes this force as one that ties us to our roots, to each other, to nature and the unseen realms. It is the invisible thread that gives us life and connects us inextricably and infinitely. It is acknowledged in every tradition, religion, and indigenous knowledge system of the first people.
